GLOBAL URBAN HEAT / FIGURE 5

Regional expansion of persistent high-effect states

2003–2024 | 43 IPCC AR6 regions | 9,713 study cities

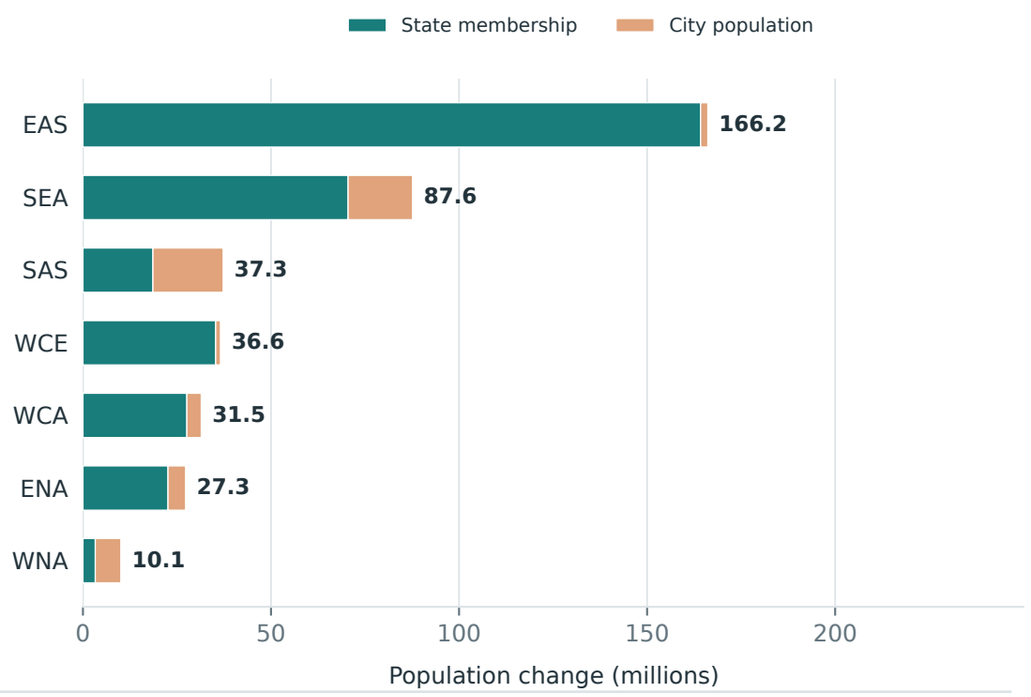

A Net increase in persistent cities by region

B Turnover can offset persistent-state gains

C Contributions to regional population growth

GLOBAL NET CHANGE

+803 persistent cities **+613.4M associated population** **79.6% membership component**

Population components: exact symmetric annual decomposition. Regional assignments: IPCC_Acronym; map boundaries: IPCC AR6.
